

FOS-41

FOS-41 is new generation optical cable splicing cassette for 12 fiber optic fiber splicings using 40 mm splice holders.

Cassette **FOS-41** is the best solution for creating small capacity cable connections using distribution box FOS-42. This distribution box is designed for 1-4 cassettes depending on modification.

These splicing cassettes can be used for creating two and up to four cable connections. Pigtailed also can be joined to the cable. Cassettes can be joined together using turn able connection. Using this way more than 12 cable connections can be made from single cable. Construction allows various ways of how cassette can be installed into distribution box.

Cassette has place designed for two incoming cable up to 7 mm in diameter fixating Cables are fixated with plastic tightenings Cassettes can be ordered in any color including transparent. Damaged splices can be easily found in transparent cassettes. Cassettes with client's logo can be specially made.

Technical specification

Incoming cable diameter, mm	up to 7.0
Incoming cable count	2-4
Minimal bend range, mm	13.0
Welding space	12
Dimensions, mm	130.0*80.0*14.5
Box height, mm	
Joining together with others, mm	10
Weight, g	37
Material	polycarbonate (PC)

Set includes

- Splicing cassette

Packing

Plastic bag - 1 pcs.

Cardboard box - 200 pcs.
